A COLLECTION OF LATIN AMERICAN CROWNS

Formed by Leo Mooy of Venezuela

The initial 800 lots in this spring auction include 835 different crowns of which 715 are from countries other than Mexico. It represents one of the larger offerings of this popular series in the past half decade. The great majority of these pieces emanate from one important collection.

Mr. Leo Mooy, a prominent businessman residing in Caracas but born in traditionalistic Holland, began forming this group in 1969. By 1976, he had a passionate desire to complete the date series as listed by Elizondo in his classic reference *Eight Reales and Pesos of the New World.*

Mr. Mooy is a frequent world traveler and had the opportunity to acquire pieces from many sources throughout North America, Europe, the Orient and his "own backyard" of South America. In addition to the presently offered items, the collection contains over 500 different Mexican republican pieces. Also Leo retained many type coins from each series. His "new" type collection will be expanded as time allows over the next decade or more. Disposing of this large quantity of coins will make it easier and less time-consuming to work (and play) with the remaining items.

Obviously many of the pieces herein offered are common, both as to date and condition. However there are also numerous scarce and unusual items which warrant collector attention. The exceptional pieces include some very elusive types as well as rare dates.

All pieces are offered on an unreserved basis; some will sell for record prices and some will be obvious bargains. There are enough coins here for everybody so please study this offering and submit some bids. Enjoy.

*1 ARGENTINA - Rio de la Plata 8 Reales 1813 J, Elizondo 1, Craig 15. The popular sunburst type representing the earliest regular-issue crown of liberated Latin America. This example is unusually well-struck and handsome. With nicely toned luster and easily Extremely Fine.

2 Argentina 8 Reales 1815 F, E1, C15. Second and final date of type. Cleaned About Very Fine.

*3 Argentina 8 Soles 1815 FL, E7, C20. One-year type coin with new non-royalist denomination. Very scarce and popular in toned Extremely Fine.

*4 Argentina 8 Reales 1827 P, E14, C26, vertical axis (inverted reverse). Second subtype with six pairs of leaves. Ex-Christensen, 12/81, $925. A scarce coin due to having light natural toning and well-defined detail. An attractive Extremely Fine.

*5 Argentina 8 Reales 1828 P, E15, C26. Scarce date. Polished but a bold sunface. VF-EF.

*6 Argentina 8 Reales 1830 P, E16, C26. The rarest date of the type. Evenly worn About VF.

7 Argentina 8 Reales 1834 P, E18, C26. Minor scratches and only About Very Fine.

*8 Argentina 8 Reales 1835 P, E19, C26. Superior example of type with lovely toning. EF-AU.

9 Argentina 8 Reales 1836 P, E20, C26. The commonest date of the type. Fine plus.

10 Argentina 8 Reales 1837 P, E22, C26. The edge shows evidence of mounting. Abt. Very Fine.

*11 Argentina 8 Reales 1831 P, E23, C26. Third subtype with additional thorns between leaves on wreath. This is the second rarest date of the La Rioja 1826-1837 series. With a few small field marks but well struck and with a bold sunface. Toned Very Fine-Extremely Fine.

*12 Argentina 8 Reales 1832 P, E24, C26. Third subtype. Cleaned Very Fine-Extremely Fine.

*13 ARGENTINA 8 Reales 1833 P, E25, C26. Third subtype. Once cleaned and now lightly toned. The sunface is extremely bold and thus a desirable example. Extremely Fine.

*14 Argentina 8 Reales 1838 R, E26, C104, Rosas issue under the Republica Argentina Confederada. With normal horizontal axis. Pleasant Very Fine - Extremely Fine.

*15 Argentina 8 Reales 1840 R, E29, C104. Slight surface flaws across the center of both obverse and reverse indicate unusual handling or usage. Old toning and Very Fine.

*16 Argentina 8 Reales 1840, E30, C105. Very Rare one-year type known as the "Rebel Peso". This is the first example of this famous insurgent coinage that we have handled. In point of fact, we recall only two other offerings in the past eight years and each of those had notable flaws. This coin pedigrees from the noteworthy Randolph Zander personal crown collection; Randolph Zander obtained it from the Jess Peters June 1973 sale of the incomparable William Higgins collection. In addition, this example deserves extra merit as it is among the nicest known due to a good strike on an unflawed planchet. Most of the examples recorded have noticeable flan imperfections and are often quite unevenly struck. Offered in Mr. Zander's collection envelope, this unflawed and naturally toned example clearly deserves a grade of at least VF - EF.

*17 Argentina 8 Reales 1852, E31, C71. Cordoba with castle and flags / sunface and rays. With essentially full luster under an orangish tone. Extremely Fine - Almost UNCIRCULATED.

*18 Argentina 1 Peso 1882, E33, Y6. Well struck, full luster, usual bagmarks. UNCIRCULATED.

19 Argentina 1 Peso 1882, E33, Y6. Heavily cleaned and a noticeable obverse edge ding. VF+.

*20 Argentina 1 Peso 1883, E34, Y6. Very scarce final date. Nice prooflike tendencies. EF-AU.

*21 BOLIVIA - LA PLATA Cob 8 Reales, circa 1574, Sellschopp 140. Philip II, clear assayer "C" below a partially obliterated assayer "B". It is theorized that dies from the original South American mint at Lima were sent to La Plata when that mint was to be opened in 1574. Those Lima dies had the Lima mint assayer letter "B" in its normal position. The new mint marked over that letter and placed its own "C" below. The La Plata mint was a failure and the dies were then sent to another new mint located in Potosi. This very rare one-year emission is a must for all crown collectors. The full name of the king is bold as are many other peripheral letters. There is a noticeable plugged hole at the bottom. The August 1983 Kagins/Americas example sold for $3520. This piece should fetch nearly as much. Almost Very Fine.

*22 Bolivia - Potosi Cob 8 Reales, circa 1585, Sellschopp 177 (PB 3 type). Philip II, assayer B. Very unusual with 100% of legend letters at least partially visible. Nearly Extremely Fine.

*23 BOLIVIA - POTOSI Cob 8 Reales 1617M, S378-379, Calbeto 983. Popular first dated local coinage. The king's name and ordinal are visible as are a faint "P-M" but the obverse is dark and unappealing. The reverse is mostly clear including an unusually bold full date. AVG/F+.

*24 Bolivia - Potosi Cob 8 Reales 1618T. Not in Calbeto nor Sellschopp but previously reported; from the Kagins/Americas sale, lot 1123. Very distinctive early dated style with unusual shield, reversed lions and castles on the reverse, and the denominational mark "V" above the "111". The ordinal "111" of Philip is evident with the "P-T" quite clear. The upper portion of the "18" of the date is missing but its attribution is certain. The distinctive lion of Brabant is like Sellschopp 379 of 1617. Very Rare. Fine.

*25 Bolivia - Potosi Cob 8 Reales 1628 P over T (clear). Not in Sellschopp as an over-assayer nor with the overall style PP2 of this date. Nice with much detail. Very rare. Very Fine.

*26 Bolivia - Potosi Cob 8 Reales 1630(T), Calbeto 999. "ANO - 630" is certain. Dark Fine.

*27 Bolivia - Potosi Cob 8 Reales 1645T, Calbeto 1019. "P-T" is bold and appears twice due to interesting double striking. "645" of date is quite clear. Rare. Nearly Very Fine.

*28 Bolivia - Potosi Cob 8 Reales 1652, Calbeto 1039. Relatively early transitional style with A-P-8 to left of obverse shield and O-E-52 to right. King's name is full. The reverse has no horizontal dividing lines. From the Kagins/Americas sale, lot 1173, where it sold for $800. This is an exceptionally pleasant example of this rare item. Easily Fine-Very Fine.

*29 Bolivia - Potosi Cob 8 Reales 1652, Calbeto 1041. The final style in this transitional series with the obverse like later years but with reverse having clear 1-PH-6 above. Handsome VF.

*30 Bolivia - Potosi Cob 8 Reales 1729M, Calbeto 1173. All 3 dates and much detail. F-VF.

*31 Bolivia - Potosi Pillar 8 Reales 1768JR, E3, C13. Carefully plugged at top, otherwise VF.

*32 Bolivia - Potosi Pillar 8 Reales 1769JR, E4, C13, rounded style "9". Almost Extra Fine.

*33 Bolivia - Potosi Pillar 8 Reales 1769JR, E5, C13, fancy style "9". Very Fine-Extra Fine.

*34 Bolivia - Potosi Pillar 8 Reales 1770JR, E6, C13. Luster is evident; nice type. VF-EF.

We sold one of the other two on a list in February 1976 (over eight years ago) for $4500 (graded EF - AU). This coin is well struck and lightly toned. The fields are lovely and unmarked except for the one interesting chopmark. Extremely Rare type. Nice Extremely Fine.

--- The next five transitional lots as well as the ½ Real (lot 867), 2 Reales (lots 878 and 879) and 4 Reales (lot 887) are from the Americas collection which is the same group that all the 1983 Kagin's ANA material derived from. These pieces are rare and deserve special consideration.

*871 Bolivia - Potosi cob 1 Real 1652E. The obverse is similar to lot 870 above. The reverse has horizontal lines added to divide the three segments and a dot is in the lower central slot. The lettering size and style is noticeably different than lot 870. Weight of ½ Real (1.65 grams). Fine.

*872 Bolivia - Potosi cob 1 Real 1652E. Obverse is similar to lots 870 - 871 above. The reverse has horizontal dividing lines and P/I-PH-6/E at top. Bottom line is E-52-P as on final design. "POTOSI•ANO•I" is partially discernible. Exceptional with nearly complete details. VF+.

873 Bolivia - Potosi cob 1 Real 1652E. The obverse is similar to lots 870-871-872 above except no dots beside pomegranate. The reverse is similar to lot 872 except "PH-6" is higher up. Fine.

*876 Bolivia - Potosi cob 2 Reales 1617M with denomination as "II". Philip III with bold name and ordinal. Same obverse die as Sellschopp 393. Much detail of popular first year. Holed VF.

877 BOLIVIA - POTOSI cob 2 Reales 162_ (1627?). Philip IIII with visible ordinal. The lions and castles are reversed - compare to Sellschopp 415 of assayer T. Very Good - Fine.

*878 Bolivia - Potosi cob 2 Reales 1652 E. Transitional with the final obverse design but the earlier reverse. 5.93 grams. Same type as the 4 Reales (lot 1169) in the Kagin's/Americas 8/83 sale. F-2-llll/PLV-SVL-TRA/E-2-E all bold. A "neat" Very Fine.

*879 Bolivia - Potosi cob 2 Reales 1652 E. Transitional with value "2" rather than date in lower reverse center. Similar to, but much nicer than, lot 396 in our 11/83 sale. Same type as Kagin's/Americas lot 1167. 6.5 grams. Unholed Very Fine.

*880 Bolivia - Potosi round cob 2 Reales 1683 V. 6.9 gram flan with all details at least discernible. Holed and slight clipping but rare so well detailed. Very Fine.

*886 Bolivia - Potosi cob 4 Reales (late 1620's or 1630-31). Round royal presentation type weighing 13.76 grams. RRRR. "PHILIPVS·IIII·DG·HISPANIARV", "P-T" and value "IIII" are mostly visible. "INDIARVM REX AN(O)" is mostly legible but the date is not. Nice central details. The color indicates it may have been gilted at one time (typical of early royal pieces). Plugged at the side. Of extreme rarity and interest. Very Fine.

*887 Bolivia - Potosi cob 4 Reales 1652 E. Transitional style similar to lot 1169 in Kagin's/Americas August 1983 ANA sale. F-4-llll/PLV-SVL-TRA/E-4-E is mostly clear as is "POTOSI" in the outer legend. Grayish-silver color indicates ex-burial. Fine.

*888 Bolivia - Potosi round cob 4 Reales 1678 E. Carlos II; 12.2 grams; somewhat porous surfaces due to ground burial but not unpleasant in appearance. RRR. Plugged Almost Very Fine.

*889 Bolivia - Potosi pillar ½ Real 1768 JR, C9. Ex-Faistauer and in RR grade. Nearly Very Fine.

*890 Bolivia - Potosi pillar 1 Real 1767 JR, C10. Rare date so nice and unholed. Almost Very Fine.

*891 Bolivia - Potosi pillar 1 Real 1770 JR, C10. Very Fine.

892 Bolivia - Potosi pillar 2 Reales 1769 JR, C11, rounded 9. Small edge nick but Very Fine.

*893 Bolivia - Potosi bust ¼ Real 1791. UNLISTED TYPE and possibly UNIQUE. This same specimen was first published by Cunietti-Ferrando in 1971 in his pamphlet, "Los Cuartillos de la ceca de Potosi". This coin features a proper bust of Carlos IIII with "CAROL·IIII" to left, "D.G. HISP·R" to right and "[illegible]·1791" below. The bust is a different punch than the Santiago 1792 proper bust cuartillas and the legend on those ends "RX". The general style is similar and the reverse seems identical. This led Cunietti to conjecture that this present piece was struck at Santiago as a pattern for the Potosi mint. Holland Wallace does not agree. Rather it appears that Potosi produced the piece in 1791 as part of its first coinage series featuring the freshly received proper bust of Carlos IIII. The Santiago pieces of 1790 (and 1791-92) may have been used as a general model but the use of the proper bust actually preceded Santiago. The mintmark appears to be handcut which is believable, since no other usage of the Potosi monogram was so tiny.

The overall style, the edge of circles-and-squares, and the historical data relating to Spain's request for a silver cuartilla at that time lead one to believe it is both genuine and important. In fact, an argument could be set forth that it is the rarest and most significant ¼ Real of all. It is certainly an honor to handle this very special item. With a somewhat crude hole but well struck with bold details and Extremely Fine.

MINOR COINAGE OF LATIN AMERICA

1230 URUGUAY 1 Centesimo 1924, KM-E2, like Y15 but a PATTERN. One of only 12 struck at the Poissy mint with "ESSAI" at reverse top. AU - UNCIRCULATED.

1231 VENEZUELA - Caracas colonial ¼ Real 1816, C2. Fully Very Fine.

*1232 Venezuela provisional fantasy 2 Reales dated "880", believed to be from the BARINAS province. Discussed in Fosalba on pages 109 - 119. Struck using fantasy dies attributed to the Caracas mint from 1812 - 1817. Struck (as usual) over a Cartagena (Colombia) 2 Reales 1811 - 1814 of which significant portions of the "Estado De C" are visible. The date "880" is unlike our April 1979 and November 1982 examples. This piece is obviously genuine and much more detailed than those previous examples. A rather sexy numismatic puzzle! Nearly "mint state" with apparent luster. Very rare in Extremely Fine.

*1233 Venezuela - Caracas 1 Real 1820 BS, C5, of the proper Caracas style. RRRR - this is only the second specimen we have handled and the previous coin was sold ten years ago. During the "bull market" in Venezuela coinage, we handled two pieces of 1817, three of 1821 and twelve of 1818. This 1820 date was the most elusive for us, even though the 1817 is actually scarcer. This specimen was never holed nor mounted as is often the case with this type. There are a couple of minor and insignificant flan imperfections due to the crude manufacturing techniques but they are not unattractive nor obvious. This piece has nice natural toning and pleasant unflawed fields. A desirable Very Fine.

1234 Venezuela - Caracas 2 Reales 1820 BS, C6, castle-lion in cross. Nice toned Very Fine.

1235 Venezuela 2 Reales of 1830 but dated 1818 BS, C6 variety. Early republic issue but without "F - 7" beside the cross. Clearly over a Madrid 2 Reales, 1806, of Carlos IIII. Very Fine.

1236 VENEZUELA - REPUBLIC ¼ Centavo 1843 WW, Y1. Extremely Fine.

1237 Venezuela ¼ Centavo 1852, Y4. Extremely Fine.

1238 Venezuela 1 Centavo 1858, Y7, raised "LIBERTAD". With 90% luster. UNCIRCULATED.

1239 Venezuela 1 Centavo 1858, Y7, incused "LIBERTAD". A trial specimen struck on a thin planchet with a plain (non-engrailed) edge. Fully red UNCIRCULATED.

*1240 Venezuela 2 Reales 1858 A, Y10. Edge slightly filed to remove nick. Very Fine.

*1241 Venezuela 5 Reales 1858 A, Y11. All primary detail is visible. Pleasant Very Fine.

*1242 Venezuela 1/5 Bolivar 1879, Y19. The elusive popular 1-year type. Pleasant unflawed VF.

NO MINIMUM BID. You are free to use our estimated values as a guide if you wish. However, bids will be accepted at any level. Do note that bids of less than 80% of wholesale will generally prove to be frivolous (see the twelfth term of sale).

PHOTOGRAPHS. Our photographer is Marney. She took the 800 or more photographs on a camera unit using Polaroid film. We are quite pleased with the pictures reproduced in this catalogue. For the most part they accurately indicate the state of preservation of the items represented. Obviously some of the coins are nicer than the photograph would indicate and a few are not as nice as their picture. Therefore we caution you to carefully consider the written description and grade; please do not assume that the picture is worth a thousand words!

GRADING. We continue to "buck the trend" by applying our traditional standards in determining the grade of each coin. The disparity between our perception of the grade of some particular coins and that ascribed to them by some of our "competitors" has often reached unacceptable levels during the past year. Either they are "blind" or we are "far behind the times". It must amaze some of our clients to receive a nice and very desirable coin when they "only" expect an EF; I too have seen pieces described and offered as "UNC" which fall below the classic standards for Extremely Fine. Please keep this factor in the forefront of your mind when you "price compare" our coins against others that have been offered elsewhere.

PHONING YOUR BIDS. Recognizing that most callers prefer to speak only with Freeman, our business phones are often not answered in his absence. Freeman is "at his desk" thirty hours per work on the average so it is difficult but not impossible to locate him via telephone. During the week immediately before our semi-annual auctions, Freeman and Marney make a concerted attempt to answer all phone calls between 8:30 a.m. and 6 p.m. On the closing day of the auction, all phone calls will receive prompt attention.

CREDIT IS AVAILABLE. Recognizing that many collectors neeed a few extra weeks or months to completely settle their auction invoices, we have again arranged for loans to be available to any responsible client. You only need to make a deposit of 25% of your invoiced total. You can then take up to six months to pay off the balance without prescribed fixed payments. The applicable interest rate is based on the "prime rate" plus 2% per year. Please do not hesitate to ask about this confidential service.

REDUCTION OF BIDS. We are again affirming a policy which has actually been effected in **all** of our previous auction sales. **Every** successful bid will be automatically reduced to not over 10% more than the second highest bid for that lot. In our two most recent auctions, the highest bids were reduced by an average of nearly 8%. Only about 25% of the successful bids could not be reduced at all. Albeit such practice is theoretically universal in the coin auction business, there are many auction houses that reputedly fail to enact it properly. So that you can doublecheck our math, we specify the precise amount of the second highest bid to every successful bidder on every lot!

ABBREVIATIONS. The standard reference books cited throughout the text include: **E** = Elizondo's "Eight Reales and Pesos of the New World," second edition. **C** = William Craig's "Coins of the World 1750-1850," third edition. **Y** = Yeoman's "Modern World Coins 1850-1964," thirteenth edition. **K-M** = Krause-Mishler's "Standard Catalog of World Coins," 1984 edition (which generally incorporated the "Y" and "C" numbers or a derivation of them). **Fr** = Friedberg's "Gold Coins of the World", fifth edition. **S** or **G-S** = Sellschopp's specialized references on Peru, including Potosi.

Address Change: You might notice that we have included a new post office box number from Mill Valley. Actually we have *not* moved; we simply rented a box at a new post office branch closer to our offices. The Sausalito "drawer N" has been our regular address since 1976 and we will continue to maintain that box until 1985. Therefore we will receive mail sent to either Mill Valley or Sausalito. Actually these two post offices are only about seven minutes apart!
